National Statistics are produced to high professional standards set out in the National Statistics Code of Practice. They undergo regular quality assurance reviews to ensure that they meet customer needs. They are produced free from any political interference.

Review of School Statistics in Northern Ireland

This is the fifth review to be published under the National Statistics Education and Training theme.

National Statistics Quality Reviews

In 1999 the Government issued the “ *Building Trust in Statistics* ” White Paper, which set out the framework for quality assuring National Statistics outputs. This was confirmed in 2000 with the launch of National Statistics and publication of the Framework for National Statistics. A key component of the Framework is:

“ a programme of thorough reviews of key outputs, at least every five years, with the involvement of methodologists and outside expertise, as appropriate. ”

This programme of quality reviews is an important way of ensuring that National Statistics and other official statistical outputs are fit for purpose and that we are continuing to improve the quality and value of these outputs.
